DNA TEST FOR LATE ONSET ATAXIA

Registered Name: Bree Barrandovske sribro

Registration Number: CLP/JRT/2660

Microchip/Tattoo Number: 203098100338851

Breed: **Jack Russell Terrier**

This dog is CLEAR of Late Onset Ataxia

Authentication code: AC4972605

Explanation of terms:

These dogs have two normal copies of DNA and are likely to be clear of LOA. The results of our research suggest that there may be other causes of ataxia in the breed so we cannot exclude the formal possibility that clear dogs could develop a genetically different form of ataxia due to other mutations that are not detected by this test.

Result authorised by: Dr. N. G. Holmes (Genetic Services Manager)

Sample received: 12/02/2014

Sample tested: Swab

Test completed: 24 February, 2014

Client:

Address: Beloky 10,Beloky,CR,27353,Czech Republic

Result only applies to sample supplied
